

Biometric Employee Punch Clock™

The best way to stop time theft and avoid "Buddy Punching"

Biometry is the most accurate way to collect employee time and attendance information. Instead of badges or passwords that can be lost, forgotten or shared, the Biometric Employee Punch Clock verifies an employee's identity based on their fingerprint.

With Biometric Employee Punch Clock™, you pay your employees for the exact time they work. No more unreadable paper time sheets, no more time calculations by hand, and you will avoid "Buddy Punching".

Your employees simply put one of their fingers in the scanner. The system automatically recognizes who is entering or leaving the company and keeps an exact record of the time. You can later print this information or export it to QuickBooks® Pro 2002-2006, Microsoft Excel or Microsoft Word and have accurate information in just seconds!

Features

- **Avoid "Buddy Punching".** Fingerprint authentication makes virtually impossible to perform time theft. Our solution will save you money permanently.
- **No more paper.** Avoid the hassle of auditing paper based time cards.
- **Improve punctuality.** You will always know who is on time and who is late via software reports.
- **Quick and easy setup.** Connect the fingerprint reader to any USB port of your Windows® PC machine.
- **Intergrates with Quick Books®.** Import / Export information directly. to QuickBooks® and eliminate double data entry.
